COMMUNITY REPORT

Tomorrow's
Technology,
Here Today.

CyberKnife Patient,
Alvin Wolk

JFK Medical Center Leadership Team

Administrative Team: Rosemarie Hayes, CNO; Gina Melby, CEO; Tim Cerrullo, COO; Jim Leamon, CFO

2010 was an exciting year for JFK Medical Center. As we reflect on our last year we also look forward to the next year of healthcare excellence. At JFK, that means we'll continue to bring breakthroughs in cardiac and orthopedic care to the area as well as the latest diagnostic tools and procedures to care for you and your family.

In 2010 JFK Medical Center was the FIRST hospital on the East Coast of Florida to be designated by the Joint Commission as a Center of Distinction in three total joints: Hip, Knee and Shoulder. The Orthopedic Institute at JFK Medical Center is a unique program offering a comprehensive treatment continuum of care within a highly integrated health care delivery network.

We remain committed to bringing the highest quality care to the community and the patients we serve.

In 2010 JFK Medical Center was also recognized as a Thomson Reuters Top 50 Hospitals in the Nation for Cardiovascular Benchmarks. This prestigious award honors hospitals that have led the way in cardiovascular service and outcomes of care.

We have also expanded our Breast Institute at JFK Medical Center bringing the latest in diagnostics and treatment for the women of Palm Beach

County. We continue to focus on our Internal Medicine Residency with the University of Miami at FAU. We look forward to graduating another class of residents this year and further developing our surgical residency program in 2011.

We are proud to share with the community our accomplishments in 2010 and we hope you find the information contained in this report useful.

“Our JFK Radiation Team is proud to offer our community patients the most sophisticated treatments combined with compassion and full dedication”
- Georges Hatoum, MD Medical Director of CyberKnife and Radiation Oncology, Affiliate Associate Professor of Clinical Biomedical Sciences, Florida Atlantic University (FAU)

Alvin Wolk with Dr. Georges Hatoum
CyberKnife Patient

“Four days after my treatment was finished I was back on the tennis courts. The treatment I received from Dr. Hatoum and the staff at JFK Medical Center was in a word - extraordinary”
- Alvin Wolk

JFK Medical Center - Atlantis, Florida

THE FIRST AND ONLY HOSPITAL BASED CYBERKNIFE™
PROGRAM IN PALM BEACH COUNTY

“JFK’s CyberKnife Center, one of a handful of CyberKnife Centers in South Florida, allows our community to access and benefit from this great innovative technology. Our pledge is to offer a unique caring environment, using advanced technology such as CyberKnife and clinical trials to contribute to advances in patient care and maximize the chance of a cure. CyberKnife is the only robotic radiosurgery system designed to effectively and non-invasively treat tumors located anywhere in the body. The combination of high precision and motion can target tumors with excellent accuracy, thus providing the patient the best chance of a cure, while minimizing the side effects of radiation.”

– Georges Hatoum, MD

*MEDICAL DIRECTOR OF CYBERKNIFE & RADIATION ONCOLOGY
AFFILIATE ASSOCIATE PROFESSOR OF CLINICAL BIOMEDICAL
SCIENCES, FLORIDA ATLANTIC UNIVERSITY (FAU)*

HCA / East Florida Division

ABOUT HCA

HCA's roots date back to 1968 when Dr. Thomas Frist, Sr. led a group of physicians to build a hospital in Nashville, Tennessee. Over four decades of hard work and dedication have made HCA – Hospital Corporation of America – the nation's leading provider of quality healthcare services, with locally managed facilities that include approximately 164 hospitals and 106 outpatient surgery centers in 20 states, and throughout Great Britain.

In Florida, there are 41 hospitals and 33 surgery centers, three division offices, and several other service facilities affiliated with HCA.

ABOUT HCA EAST FLORIDA DIVISION

The East Florida Division, located in Ft. Lauderdale, encompasses 12 hospitals in South Florida and the Treasure Coast area in addition to multiple ambulatory surgery centers and imaging centers, a supply chain center, and an integrated regional laboratory. Together, the network employs more than 13,900 individuals and has close to 5,000 physicians on staff.

TECHNOLOGY

We are upgrading technology at an unprecedented rate to ensure we can continue to provide clinical excellence and optimal patient outcomes. From a new CyberKnife™ at JFK Medical Center and a Synergy S at Aventura Hospital and Medical Center for the latest in cancer fighting technology to the Electronic Health Record (EHR), our facilities have integrated wireless and digital technology through all modalities. Robotics is another strong focus – we now offer eight Robotic programs – enabling surgeons to perform precision work with very small incisions and faster recovery.

COMMUNITY SUPPORT

JFK Medical Center is an affiliate of HCA East Florida. Our employees provide both financial and volunteer support to countless civic organizations, schools, colleges, city projects, nonprofit and charitable organizations in their communities.

UNINSURED/UNDERINSURED PATIENT EDUCATION

HCA East Florida Hospitals are committed to helping uninsured/ underinsured patients who qualify for local and state health benefits. Each hospital offers on-site benefit education and Medicaid enrollment assistance.

VOLUNTEERING

In 2010, HCA East Florida hospital employees and volunteers dedicated 377,444 hours of patient and family support. Events include participation in building homes with Habitat for Humanity, Making Strides for the American Cancer Society, and promoting wellness and education through complimentary health screenings and lectures. We sponsor the Team Storm Riders cycling team which ranked 49th in the country for raising funds for the National Multiple Sclerosis Society, with riding members from our hospitals' staff.

HELIO CASTRONEVES

Helio Castroneves, three time Indy 500 Champion, spokesperson for HCA East Florida, takes time out of his busy schedule to visit pediatric patients.

**CONSULT-A-NURSE®
HEALTHCARE REFERRAL
& INFORMATION**

Consult-A-Nurse® is a free service from our HCA Hospitals designed to provide you with physician referrals and health information. Our nurses are available 24 hours a day by phone at 1-866-4-HCA-DOCs (1-866-442-2362).

Physician Referral – Our service makes finding a doctor easier by providing information about physicians affiliated with HCA hospitals, including medical specialty, skills and experience, physicians who are accepting new patients, and office hours and location.

Health Information – Our registered nurses provide consultation and answer health-related questions.

Rudy Diaz, Father of scholarship recipients

“I had no hope of sending my children back to private school - we just couldn’t afford it. But then we learned about Step Up For Students. It was like an answered prayer.”

AWARDS AND RECOGNITION

In 2010, JFK Medical Center was named one of the nation’s 50 Top Hospitals® for cardiovascular care by Thomson Reuters. Thomson Reuters’ annual study — 50 Top Hospitals: Cardiovascular Benchmarks — examined

the performance of 971 hospitals by analyzing clinical outcomes for patients diagnosed with heart failure and heart attacks and for those

who received coronary bypass surgery or percutaneous cardiovascular interventions (PCI) such as angioplasties. JFK is also recognized as the following:

STEP UP FOR STUDENTS

Since 2005, HCA has redirected corporate income tax to the Step Up for Students program. Through this gift, low-income students receive a K-12 scholarship enabling them to receive a quality education tailored for their specific needs. It is well documented that a “one size fits all” education is not the best approach for every student. Families with the means may choose the perfect school for their child, but that’s simply not an option for many people. Through this program children who qualify for the National School Lunch Program can receive scholarships. Qualifying parents can use these grants to send their child to the public or private school that best meets their child’s needs.

Step Up for Students Program ¹	\$55,475,000
# of Low-Income Student Scholarships	14,351

¹ Represents 6 year contribution for HCA Hospitals in the state of Florida

Quality and Patient Safety

"Putting Patients First" is the foundation of our culture and passion for quality healthcare. Many of the initiatives we implement serve as national models for the industry today.

hCare ELECTRONIC HEALTH RECORD (EHR)

With EHR, access to patient health information is simplified by improving the quality, effectiveness, and efficiency of healthcare by immediately providing clinicians with accurate information needed to provide optimum patient care. It is our belief that EHR will be one of the most fundamental support systems for optimizing the quality of healthcare that we provide in our facilities.

hCare HUB/MOBILITY PHYSICIAN PORTAL

The hCare hub portal integrates the Electronic Medical Record of our physician practices to our hospitals with the portal interface, allowing physicians access to their patients' clinical records, allowing for more efficient use of their time and resources with information at their fingertips, both on their office computers and via smart phone mobile technology.

hCare ACCESS

HCA is excited to bring to our physicians and their office staff a faster and more convenient remote login solution "hCare Access." Whether using PC, MAC, or iPad, physicians have access to the same clinical applications they currently use at the hospital from virtually anywhere. Connection time is 75% faster than prior remote access solutions, and Single Sign-On Password Management is available.

COMPUTERIZED PROVIDER ORDER ENTRY (CPOE)

CPOE is a patient safety technology that allows providers to place orders directly into the clinical information system, checking each order against the patient's allergies, and other pertinent clinical information. Providers are alerted to any potential contraindications or interactions at the time the orders are placed. HCA East Florida is moving to a streamlined process that eliminates opportunities for medical error. In addition to the safety checks, provider orders go immediately to the department(s) that will implement/initiate the order, leading to more timely and efficient patient care. The system also reduces the possibility of incorrect orders due to clinicians not having to interpret written/verbal orders. We have implemented this system in all of our hospitals' Emergency Departments and hospital-wide at St. Lucie Medical Center. All facilities of HCA East Florida will implement CPOE hospital-wide in 2011.

ELECTRONIC BAR-CODED MEDICATION ADMINISTRATION

HCA East Florida has implemented eMAR in all of our hospitals to prevent medication errors and improve patient safety. The critical components of this safety technology are bar-coded armbands, bar-coded medications, and safety checks within the eMAR software. Each patient receives an armband with their own unique bar code. Before a medication is administered, the bar code on the patient armband and the bar code on the medication are scanned allowing the nurse, or therapist, to verify the right patient is receiving the right drug in the right dose at the right time. The software checks each medication against the patient's drug history and lab results. If conflicts or potential drug interactions are identified, warnings alert

"I enjoy giving back to our patients. It gives me a purpose and a good feeling when I leave everyday that I have helped our patients."

*– Krista
Laundni*
JFK VOLUNTEER

the nurse to double check, verify and/or call the doctor before administering the medication.

HCA's results with eMAR have been instrumental in encouraging the FDA to develop a standardized bar code system for use throughout the pharmaceutical industry and at all hospitals to improve patient safety.

Bar Code Transfusion Administration enables clinicians to scan the existing patient ID band and the bar code on the blood product to ensure that the correct product is being issued and delivered to the correct patient for administration. This capability is similar to the functionality introduced by the eMAR & Bar Coding project (now, BCMA, "Bar Code-enabled Medication Administration").

PICTURE ARCHIVING AND COMMUNICATIONS SYSTEMS (PACs) & MUSE

The PACs system stores digital versions of patients' clinical images such as CT and PET scans, MRIs and X Rays so that they can be readily accessed by our clinicians at the hospital or at a remote location. The MUSE system digitizes EKG tracings, allowing for easy access for clinicians.

VOICE RECOGNITION SYSTEM

This system creates efficiency in our radiology departments by allowing our physicians to report their clinical findings directly on a system that recognizes their voice, eliminating the delays often caused by transcriptions. The report then gets reviewed on screen by the radiologist

where it can be corrected, signed, and sent for utilization by other clinicians usually within a 30 minute time frame.

EMERGENCY DEPARTMENT MANAGEMENT MODULE (EDM)

The Emergency Department Management Module (EDM) is used to manage the flow of patients through the emergency department from the patients' arrival into the department through their departure. Both CPOE and eMAR fully integrate into EDM allowing for streamline communication of orders and medication administration between physicians and Emergency Department staff. EDM is also the technology that allows HCA East Florida to measure and track ER wait times accurately and in a timely manner.

TELEHEALTH

HCA East Florida Division is piloting at JFK Medical Center the ability to monitor patients from a distance using electronic devices to record and send measurements of patient vital signs. Telehealth technologies are evolving to provide both patients and healthcare professionals with real-time interactive health systems that can engage both patients and their care management teams more fully in the treatment of their conditions. Upon discharge, patients are monitored and managed from home.

Specialized Care

EMERGENCY DEPARTMENT EXCELLENCE

For the past few years, the entire HCA East Florida Division has been working diligently to improve the effectiveness and efficiency of its Emergency Rooms. Our strong focus on enhancing care and improving ER processes has dramatically reduced wait times to below national averages. In fact, we're so successful, average ER wait times are available to the public. Using various innovative methods, local residents have immediate access to average ER wait times. Patients have easy access to an estimate of how long they will have to wait to receive care in the ER, therefore providing them with the resources to make informed medical decisions about their urgent needs when seconds count. Wait times for all of our hospitals are updated every 30 minutes and are available on:

-  **Via text message: Text "ER" to 23000**
-  **iPhone Web Application: <http://er.hcaeastflorida.com>**
-  **iPhone "iTriage" Application: AppStore**
-  **Roadside Digital Billboards throughout our region.**

Legendary coach Don Shula, spokesperson for HCA's East Florida Division hospitals

Since the ER wait times campaign was so successful with the communities we serve, we are now offering ER wait times for our hospitals with pediatrics. Our

customers will be able to text ERKids to 23000 and have access to immediate average ER wait times for children's emergency care.

THE HEART & VASCULAR INSTITUTE AT JFK MEDICAL CENTER

The Heart and Vascular Institute at JFK Medical Center is recognized as a 2010 Thomson Reuters 50 Top Hospitals in Cardiovascular Benchmarks. This prestigious award honors hospitals that have led the way with superior performance in cardiovascular service in outcomes of care. JFK Medical Center is the most experienced cardiovascular hospital in the county performing more open heart surgeries, cardiac catheterizations, angioplasties and other related diagnostic procedures than any other facility.

Founded more than twenty years ago, the Heart & Vascular Institute at JFK Medical Center is a premier facility within a hospital. The cardiac surgery team has performed over 12,000 open heart surgeries since the institute's inception and boasts high volumes and superb outcomes. The electrophysiology lab (EP) is one of the busiest labs in the southeastern United States. The cardiac catheterization laboratory at JFK is the only closed lab in Palm Beach County, the university model of delivering this type of care. JFK Medical Center is also a leader in Minimally Invasive Heart Surgery. Minimally invasive heart surgery is performed through small incisions, sometimes using specialized surgical instruments. The incision used for minimally invasive heart surgery is about 3 to 4 inches instead of the 6- to 8-inch incision required for traditional surgery.

THE COMPREHENSIVE STROKE CENTER AT JFK MEDICAL CENTER

JFK's Stroke Center is the FIRST and most EXPERIENCED comprehensive stroke center in Palm Beach County. Because JFK is a comprehensive stroke center we can provide not only IV-TPA but we can also provide

NeuroInterventional Procedures if certain criteria are met. The window can be expanded to 6 – 8 hours for some of these procedures.

Although a Primary Stroke Center can provide stroke patients with high-quality care, some patients with complex stroke types, severe deficits, or multi-organ disease may require and benefit from specialized care and technological resources offered at a Comprehensive Stroke Center. Comprehensive Stroke centers are staffed with the necessary personnel, infrastructure, expertise, and programs to diagnose and treat stroke patients who require a high intensity of medical and surgical care, specialized tests, or interventional therapies.

Comprehensive stroke centers have not only Neurologists, but also Neurosurgeons on call 24/7, who provide advanced surgical intervention to the patient who suffer severe, complex neurosurgical conditions. NeuroInterventional Radiologists are available to provide advanced endovascular techniques such as embolization (coiling) intracranial aneurysms, placing stents, or removing clots in the brain. With an excellent team and advanced technologies in place to help, The Stroke Center not only saves lives, but brain function and quality of life as well.

COMPREHENSIVE CANCER CARE

With highly specialized medical care, early detection and prevention programs, the JFK Comprehensive Cancer Institute offers cancer patients and their families a full continuum of care. Our program combines the experience of some of the finest cancer specialists in South Florida, working together to ensure the best outcome for each patient. Our comprehensive team specializes in breast, dermatologic, gastrointestinal, head and neck, neurological, neurosurgical, ophthalmic, orthopedic, pulmonary, interventional radiology, urologic hematology/ medical, radiation and surgical oncology. In addition, these specialists rely heavily on the assistance of radiologists, pathologists, psychiatrists, rehabilitation specialists and anesthesiologists to provide the finest cancer treatment. Through an interdisciplinary team

approach, our team of professionals prescribes each patient a plan of treatment personalized to the type and stage of their cancer, as well as, the overall health and well being of the individual.

JFK's team utilizes the latest treatments available to aggressively and safely treat cancer. Now, the newest technology in cancer detection is available, right here at JFK Medical Center. The CyberKnife® System, offered exclusively at JFK Medical Center among HCA's East Florida hospitals, is not a knife at all, but is an alternative to surgery for the treatment of tumors anywhere in the body! There are no cuts, but instead high doses of radiation are delivered to the tumor sites with extreme accuracy.

ROBOTIC SURGERY

The use of robotics at JFK takes minimally invasive techniques into a new era, further minimizing the physical and emotional impact of surgery on patients. Surgeries are performed through small incisions, which replace the large incisions needed for conventional open surgeries. Robotically-assisted minimally invasive surgery

Specialized Care *(continued)*

represents a third generation of surgery, one which builds upon the advances to open surgery introduced by minimally invasive surgery.

Robotic technology takes surgery beyond the limits of the human hand, introducing precise, versatile instrument movement combined with three-dimensional visualization of the operative site. Patient benefits include less patient trauma and pain, minimal scarring, less blood loss, faster recovery and shorter hospital stays.

THE BARIATRIC SURGERY PROGRAM AT JFK MEDICAL CENTER

The Bariatric Surgery Program at JFK Medical Center has been accredited by the American Society for Metabolic and Bariatric Surgery. The designation means JFK Medical Center has met the essential criteria that ensure it is fully capable of supporting a bariatric surgery care program to help morbidly obese patients lose weight and that its institutional performance meets the requirements outlined by the Accreditation Program. Medicare coverage of bariatric procedures is only given to surgical programs certified by the American Society for Metabolic and Bariatric Surgery.

Accredited bariatric surgery centers provide not only the hospital resources necessary for optimal care

of morbidly obese patients, but also the support and resources that are necessary to address the entire spectrum of care and needs of bariatric patients, from the pre-hospital phase through the post-operative care and treatment process. Combined with the medical staff, the JFK Medical Center Bariatric Institute program employs a full time dietician and psychologist who do pre- and post-operative counseling with surgery patients. Specially designed equipment for patients is also located throughout the medical center for use by bariatric patients.

THE BREAST INSTITUTE AT JFK MEDICAL CENTER

Compassionate Care from the Specialists The Breast Network at JFK Medical Center has earned a reputation for its dedication to helping patients fight and beat breast cancer on all fronts. Using the latest diagnostics and most advanced treatments available, our board-certified physicians are known for their experience and expertise in breast cancer care.

We have created an integrated network of imaging centers and our hospital to create world class breast care in a convenient setting for our patients.

THE UNIVERSITY OF MIAMI MILLER SCHOOL OF MEDICINE

At FAU Internal Medicine Residency Program The Internal Medicine Residency Program based at JFK Medical Center and the West Palm Beach VA and sponsored by The University of Miami Miller School of Medicine at FAU is based upon the latest education initiatives of the ACGME and emphasizes an innovative and progressive curriculum. Residents work out of a brand new longitudinal care clinic, outfitted with a state of the art electronic medical record system. They learn inpatient cardiology following patients from entry into the hospital right through any cardiac procedure they undergo including cardiac angiography, EP studies, and even cardiac surgery. They rotate through one of the most dynamic interventional radiology programs in the country, and learn stroke care and the neurosciences in an extremely highly regarded stroke center. This will

serve to decrease the deficiency of primary care physicians in our community as studies show residents tend to stay in the communities in which they train.

ORTHOPEDIC INSTITUTE AT JFK MEDICAL CENTER

JFK Medical Center is the FIRST hospital on the East Coast of Florida to be designated by the Joint Commission as a Center of Distinction in three total joints: Hip, Knee and Shoulder. The Orthopedic Institute at JFK Medical Center is a unique program offering a comprehensive treatment continuum of care within a highly integrated health care delivery network. Our goal is simple: to return our patients to normal function as quickly and safely as possible. To reach this goal, the medical professionals at The Orthopedic Institute enlist a comprehensive, leading edge approach to the prevention, assessment, treatment and rehabilitation of musculoskeletal injuries.

Our highly trained team of surgeons, nurses, physician assistants, rehabilitation specialists and various medical support personnel works with each patient and their primary care physician to develop a treatment plan specifically for that patient.

We know you have choices when choosing your orthopedic care. With board certified physicians and surgeons using the latest technology such as the Hana Table™, ConforMis™, Reverse Shoulder Replacement, and the SuperPath™ Technique. All performed within

our dedicated Orthopedic Institute. Quality, Experience, and Commitment to excellence all proven with our designation. By combining extensive clinical expertise with a compassionate, caring treatment philosophy, we have created a program known for its quality of care.

In December 2010 JFK Medical Center celebrated its two year anniversary of our hospital expansion, building out the 5th floor tower of the south patient tower, adding 36 beds to the facilities 424-bed capacity bringing the total capacity to 460. The \$10.9 million expansion consists of a 24,750 square foot dedicated orthopedic unit; all 36 rooms on the floor are private patient rooms and 100% handicap accessible. The unit includes a physical therapy department and 3,400 square feet of gym and treatment space.

SPINE INSTITUTE AT JFK MEDICAL CENTER

Our team of experts at The Spine Institute at JFK Medical Center includes board-certified orthopedic surgeons and neurosurgeons with extensive training and orthopedic certified/trained professional nurses, physical therapists and technicians. Our highly trained staff is prepared to manage joint replacements, back and neck surgery including spinal fusion, fracture repairs, sports related injuries, pain management and rehabilitation services.

The Hana Table™ is especially designed for joint replacement surgery and makes it easier to replace the natural joints with prostheses by means of a technique which does not require cutting the muscles or the ligaments.

iTriage

HCA AND EAST FLORIDA

As a community service, iTriage is brought to you by your local HCA facility. iTriage provides access to medical information on thousands of symptoms, diseases, and medical procedures.

HELPING YOU MAKE BETTER HEALTHCARE DECISIONS

iTriage was developed by two Colorado emergency physicians to put better medical information into their patients' hands. Drs. Peter Hudson and Wayne Guerra have now empowered an entire nation of healthcare consumers with a comprehensive and revolutionary acute care decision tool.

ACCESSIBILITY

iTriage is available as a free app for iPhone®, Android™, Blackberry® & Palm® Smartphones or at www.iTriageHealth.com

CHECK YOUR SYMPTOMS

Search or browse our database of thousands of symptoms for possible causes.

RESEARCH DISEASES AND PROCEDURES

Read disease descriptions and get information about tests and treatment. Search for images or video and find doctor/nurse advice lines.

ADDITIONAL FEATURES

-  ***ER Wait Times where available***
-  ***Healthcare Cost Information***
-  ***Physician/Hospital Quality Reports***
-  ***Access To Your Personal Health Record***

FOLLOW US ON SOCIAL MEDIA

Social Media has become an important method of conversation for our communities. All of our 12 hospitals can be accessed through Facebook and Twitter and there is a video library available on YouTube. Be up-to-date on the latest technologies, services, and our community involvement.

Our hospitals' websites don't just give you information, they interact with you while giving you information. Social media gives you the ability to communicate with us directly and that is important to us.

- ***Social networking now accounts for 22% of all time spent online in the US***
- ***A total of 234 million people age 13 and older in the US used mobile devices to access the internet***
- ***Twitter processed more than one billion tweets in December 2010 and averages almost 40 million tweets per day.***
- ***The number of social media users age 65 and older grew 100 percent throughout 2010, so that one in four people in that age group are now part of a social networking site.***
